

Land Use Bylaw Update

Janvier

Purpose

This document aims to provide an overview of the Land Use Bylaw (LUB), highlight the key changes in the updated LUB, and outline the next steps for its implementation.

What is a Land Use Bylaw?

The Municipal Government Act requires all municipalities in Alberta to adopt a Land Use Bylaw (LUB). The LUB regulates the use and development of land and buildings within the Regional Municipality of Wood Buffalo. The purpose of the LUB is to:

- Separate the Municipality into land use districts.
- Establish site provisions and determine permitted and discretionary land uses.
- Establish the development permit and amendment process.
- Regulate standards for the height, size, and location of buildings.
- Determine parking, signage, landscaping, and urban design standards.
- Implement the vision of the Municipal Development Plan and Area Structure Plans.

Land Use Bylaw History and Timeline

The current LUB was adopted in 1999, with several amendments since. An update to the LUB is necessary to remove inconsistencies, respond to changes in development trends, and align with current statutory plans.

An updated LUB has been drafted based on extensive engagement and feedback from residents, the business community, and Indigenous partners. Planning and Development Services intends to bring the updated LUB to Council for adoption in late 2024.

The below timeline highlights the key phases and milestones of the LUB rewrite:

What We Heard During Engagement

USER-FRIENDLY BYLAW

HOW WE DID IT

“Make the Land Use Bylaw clearer and easier to use.”

- The updated LUB offers clear, concise language in a format that is easier to follow.
- Graphics have been improved and definitions have been clarified and consolidated wherever possible.

SERVICES

HOW WE DID IT

“Allow for more commercial and retail type developments.”

- A new Hamlet Community Core (HCC) District has been proposed in the updated LUB to allow for a broad range of residential and commercial uses.

HOUSING

HOW WE DID IT

“More affordable housing options are needed in the community.”

- Additional secondary suite types have been proposed to encourage a wider variety of housing options that could help support housing affordability.

CULTURE

HOW WE DID IT

“More spaces needed to engage in traditional activities.”

- Many proposed land use districts allow for the development of facilities and spaces that promote traditional cultural activities.

General Updates on Regulations

Below is a summary of some of the key regulations in the updated Land Use Bylaw.

Secondary Suites: The current LUB only allows for the development of basement suites in most residential districts. The updated LUB proposes additional types of secondary suite options. These include basement suites, loft suites, garden suites, and detached garage suites.

Basement Suite

Self-contained secondary dwelling unit located on the basement level of a principal dwelling

Loft Suite

Self-contained secondary dwelling located on the loft level of a principal dwelling

Garden Suite

Accessory dwelling unit located in a single storey building separate from the principal dwelling

Detached Garage Suite:

Accessory dwelling unit located above a detached garage

Accessory Buildings: To address the community's needs, the updated LUB proposes to increase the maximum lot coverage allowed for accessory buildings in the rural service area from 12 per cent to 15 per cent of the total lot area, up to a maximum of:

- For parcels under 2.0 ha (4.9 acres) in size, the proposed maximum area for an accessory building has been increased from 140 sq m to 250 sq m.
- For parcels larger than 2.0 ha (4.9 acres), the maximum area remains 350 sq m.

Home-based Businesses: To provide clarity for home-based businesses, the proposed types of home businesses in the updated LUB have been renamed.

- Home Business is renamed "Home Business, Major" and may include client visits and a commercial vehicle for the primary use of the business.
- Home Occupation is renamed "Home Business, Minor" and is where the business activity conducted by the resident will not generate client vehicular traffic.

Landscaping: In the updated LUB, the landscaping requirements below are proposed to assist with stormwater management and provide for a pleasant environment.

- A minimum of 30 per cent soft landscaping (grass and planting beds) is required on residential lots.
- Landscaping is required for new developments in the Hamlet Community Core District, Highway Commercial District, and Medium Industrial District within the rural service area.
- FireSmart landscaping principles have been proposed to reduce the risk of wildfire damage.

Summary of Land Use Districts in Janvier

Proposed Land Use Districts	Proposed Land Use District Purpose	Summary
HR1 – Hamlet Residential 1	The purpose of this district is to maintain the existing character of established residential areas and provide for low density residential development.	This district has been proposed to align with the existing residential development in Janvier.
HCC – Hamlet Community Core	The purpose of this new district is to provide for a variety of compatible institutional, commercial, recreational, and residential uses in the community core of a hamlet.	The central area of the community is proposed to be the HCC District to allow for the development of a wide variety of businesses and services.
IM – Medium Industrial	The primary purpose of this district is to provide for industrial uses that may impact adjacent land uses. These uses may carry out a portion of their operation outdoors and may impact surrounding non-industrial uses through the generation of emissions, noise, odours, vibrations, heat, bright light, or dust.	This district has been proposed to create more certainty around development of industrial uses that are appropriate within the community.
HC – Hamlet Commercial	The purpose of this district is to allow for residential uses and compatible small-scale commercial and retail uses outside of the Hamlet Community Core District.	This district has been updated to create more options for residential development while allowing for appropriate commercial activities within specific areas of the community.
PS – Public Service	The purpose of this district is to provide for the delivery of educational, health, government, and other institutional services.	This district proposes more uses to provide the community with additional services.
PR – Parks & Recreation	The purpose of this district is to provide for the development of land for parks and recreational facilities intended for the use and enjoyment of the public at large.	This district proposes more uses to provide for the development of facilities and spaces that promote traditional cultural activities.

UE – Urban Expansion	The purpose of this district is to protect land, suited for future urban and hamlet expansion, from premature subdivision and development.	This district is proposed to accommodate future development needs.
-----------------------------	--	--

Next Steps for the Updated Land Use Bylaw

- Planning and Development Services is reviewing the updated LUB.
- Public engagement is currently taking place.
- The updated LUB will be presented to Council.
